

Sritam Ghosh

Java Developer — Software Engineer

+91 7751038603 — sritamghosh50@gmail.com — linkedin.com/in/sritamghosh — github.com/sritamghosh50

Summary

Engineering graduate with hands-on experience building and testing full-stack applications using Core Java, Spring Boot, REST APIs, and MySQL. Completed five internships spanning software development, RTL design, and aerospace/space-tech R&D, with strong fundamentals in OOP, JDBC, and Git-based collaborative development. Looking to bring this versatile, fast-learning foundation into a Java Developer role focused on building scalable, production-grade applications.

Skills

Languages: Java, JavaScript, HTML, CSS

Technologies: Spring Boot, REST APIs, Hibernate/JPA, JDBC, MySQL, PostgreSQL

Concepts & Tools: OOP, Exception Handling, Multithreading, Git, GitHub, Postman

Experience

Software Engineering Intern — BranchX

May 2025 – Jul 2025

Bangalore, India

- Built and tested front-end interfaces for “10X Fi,” a digital banking platform, using HTML, CSS, JavaScript, and Java.
- Identified and resolved functional and UI bugs across modules, improving application stability and load performance.
- Delivered all assigned features on schedule, collaborating with the development team through structured testing cycles.

RTL Design Intern — Maven Silicon

May 2025 – Jun 2025

Bangalore, India

- Designed an AHB-to-APB Bridge in RTL, translating protocol specifications into a working hardware description.
- Gained practical exposure to digital design verification and protocol-level communication between bus interfaces.

Intern — Aeronautical Development Establishment, DRDO

May 2024 – Jul 2024

Bangalore, India

- Contributed to Antenna Tracking Systems development, supporting the creation and simulation of basic antenna models.
- Applied engineering fundamentals to real-world defense R&D simulations under expert mentorship.

Intern — Indian Space Research Organisation (ISRO)

Apr 2024 – Ma 2024

Bangalore, India

- Participated in the “Exploration of the Solar System” project, gaining exposure to space science research methods.
- Completed structured Space Science and Technology Awareness Training alongside the project work.

Trainee — Naresh I-Technologies

Dec 2023 – May 2024

Hyderabad, India

- Completed intensive professional training in core software development technologies, building a foundation in programming and development best practices.

Projects

10X Fi — Digital Banking Platform

Java, Spring Boot, REST APIs, MySQL

- Architected backend modules in Java and Spring Boot, applying OOP principles for clean, maintainable code.
- Designed and implemented RESTful APIs integrated with a MySQL database for core banking functionality.
- Validated API functionality and reliability through systematic testing in Postman.

IoT-Based Smart Agriculture Monitoring System

Java, Arduino, RS485 NPK Sensor

- Built a soil nutrient monitoring system using RS485 NPK sensors interfaced with Arduino for real-time data capture.
- Implemented Modbus communication protocol to enable reliable real-time transmission of agricultural sensor data.

Education

Bachelor of Technology — Electronics and Telecommunication

2022 – 2026

Veer Surendra Sai University of Technology, Burla, Odisha • CGPA: 7.60/10
